Woodworking cut list

Manual worksheet | A4 | Print at actual size | One material group per sheet

---

Project / revision: _____ Date: _____

Material / measured thickness: _____

Units (circle): inches / mm Stock W x L: _____ Kerf: _____

Trim per edge: _____ Size basis: finished / substrate blank (circle)

Part ID	Assembly / label	Qty	Width	Length	Grain / rotation / edges

Example only - not part of your blank list

S1 | Closet shelf | Qty 8 | 13.75 W x 34.75 L in | actual thickness 0.75 in

Unbanded example. Rotation only if material permits; record grain explicitly.

Keep kerf separate from part dimensions. Apply banding deductions only once.

Check all quantities, joinery, supports and hardware before cutting.

This PDF does not calculate layouts and cannot be imported as a cut list.

Type your list into CSV/XLSX to import, or enter parts directly in the optimizer.
